

# About us

If by “*About us Global portfolio*” you meant the **general idea of a global investment portfolio**, here’s what that concept usually means:

## 📌 Global Portfolio (Finance)

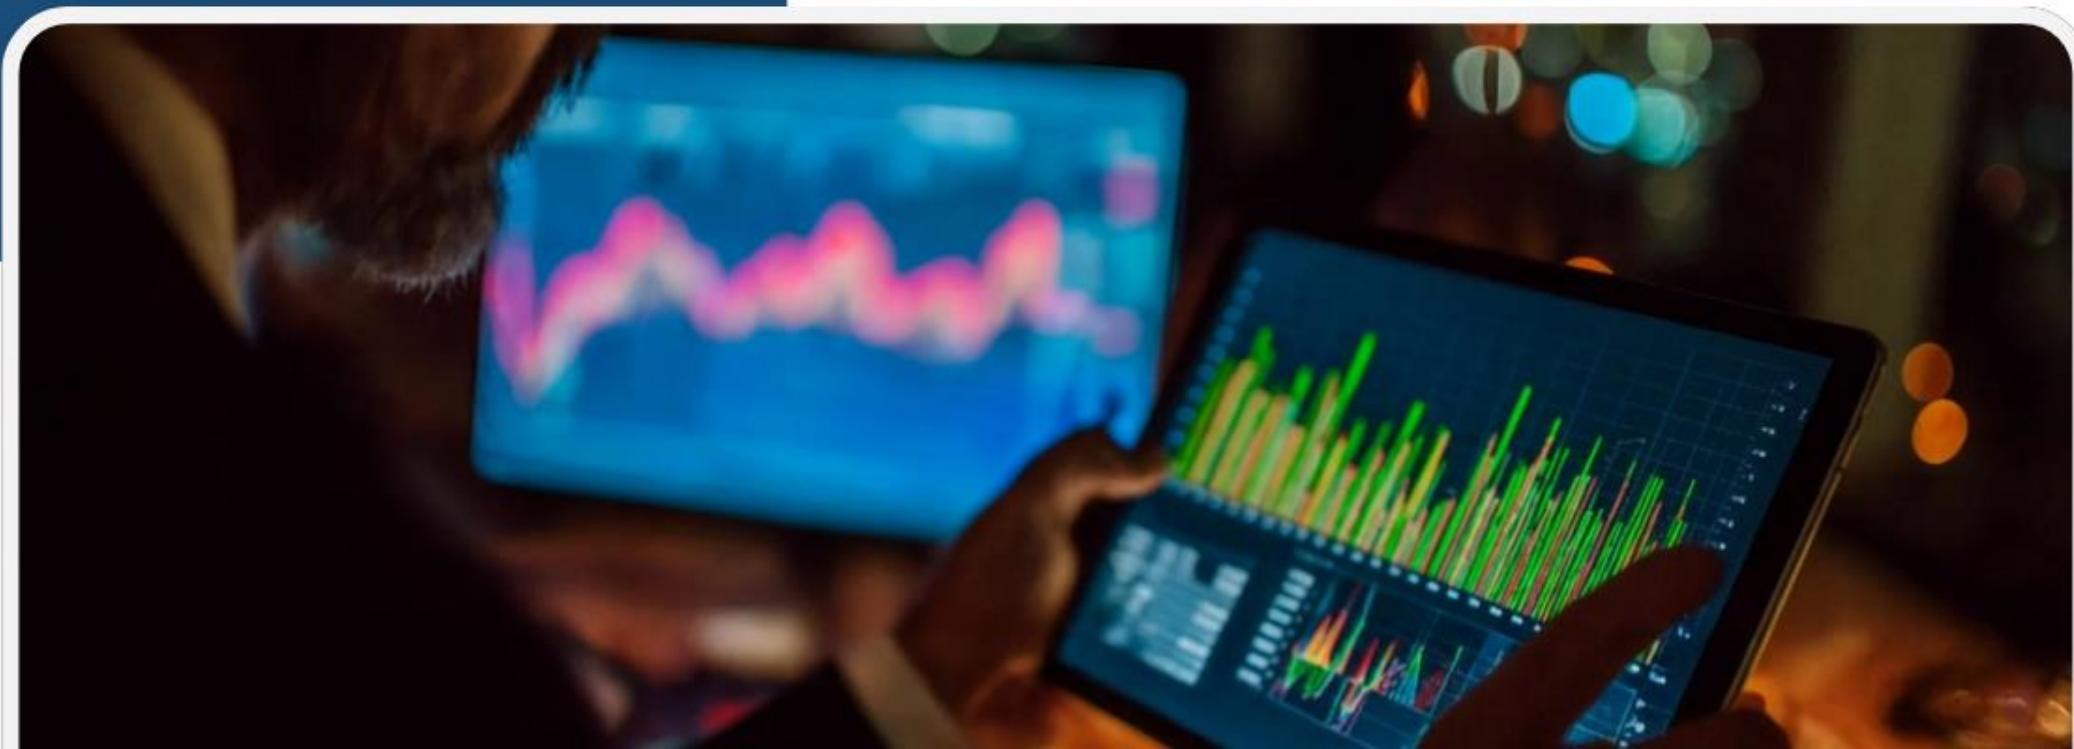

A *global portfolio* is a diversified investment portfolio that holds assets from multiple countries and regions worldwide. It includes a mix of stocks, bonds, real estate, and other asset classes to **spread risk and capture global growth opportunities**.

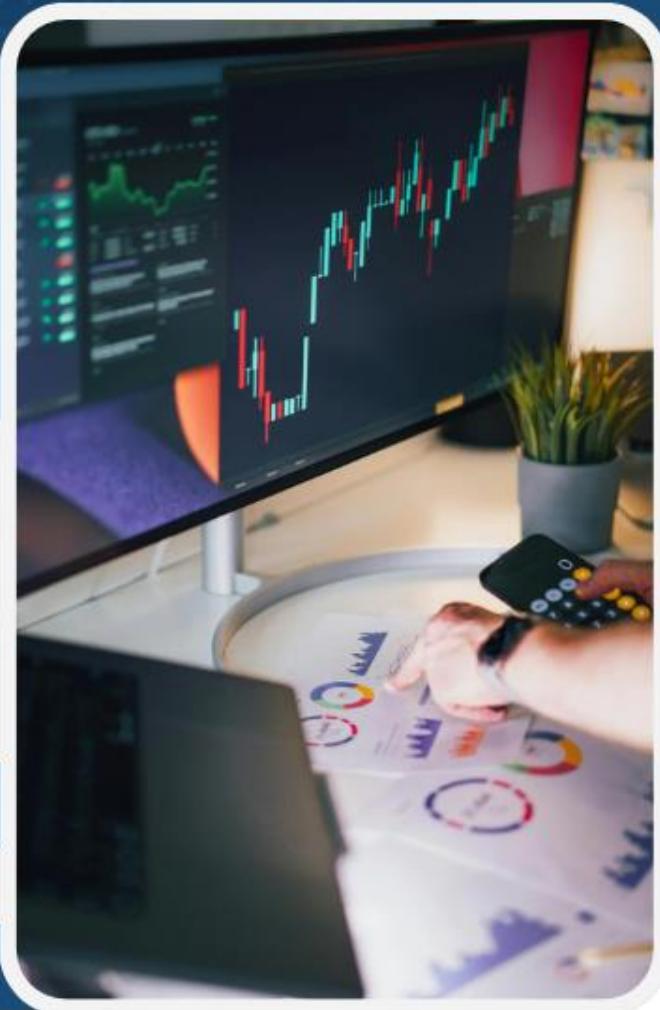

# What is Forex Trading

**Forex Trading** (also called **Foreign Exchange Trading** or **FX Trading**) is the process of **buying and selling currencies** to make a profit from changes in their exchange rates. The Forex market is the **largest financial market in the world**, with trillions of dollars traded every day.

# How Forex Exchange Works

Forex works by trading **two currencies** together, called a **currency pair**.

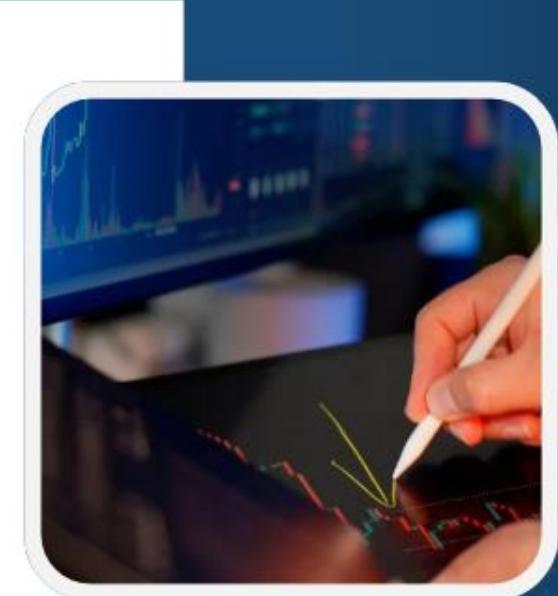

**Example:**

EUR/USD = Euro vs US Dollar

USD/INR = US Dollar vs Indian Rupee

The **first currency** is the *base currency*

The **second currency** is the *quote currency*

# How Forex Exchange Works

## Buying and Selling

- Buy a pair if you think the base currency will **increase**
- Sell a pair if you think the base currency will **decrease**

### Example:

If EUR/USD = 1.1000

- You buy → Expect price to rise
- You sell → Expect price to fall

## 3 Price Movement = Profit or Loss

- If price moves in your direction → **Profit**
- If price moves against you → **Loss**

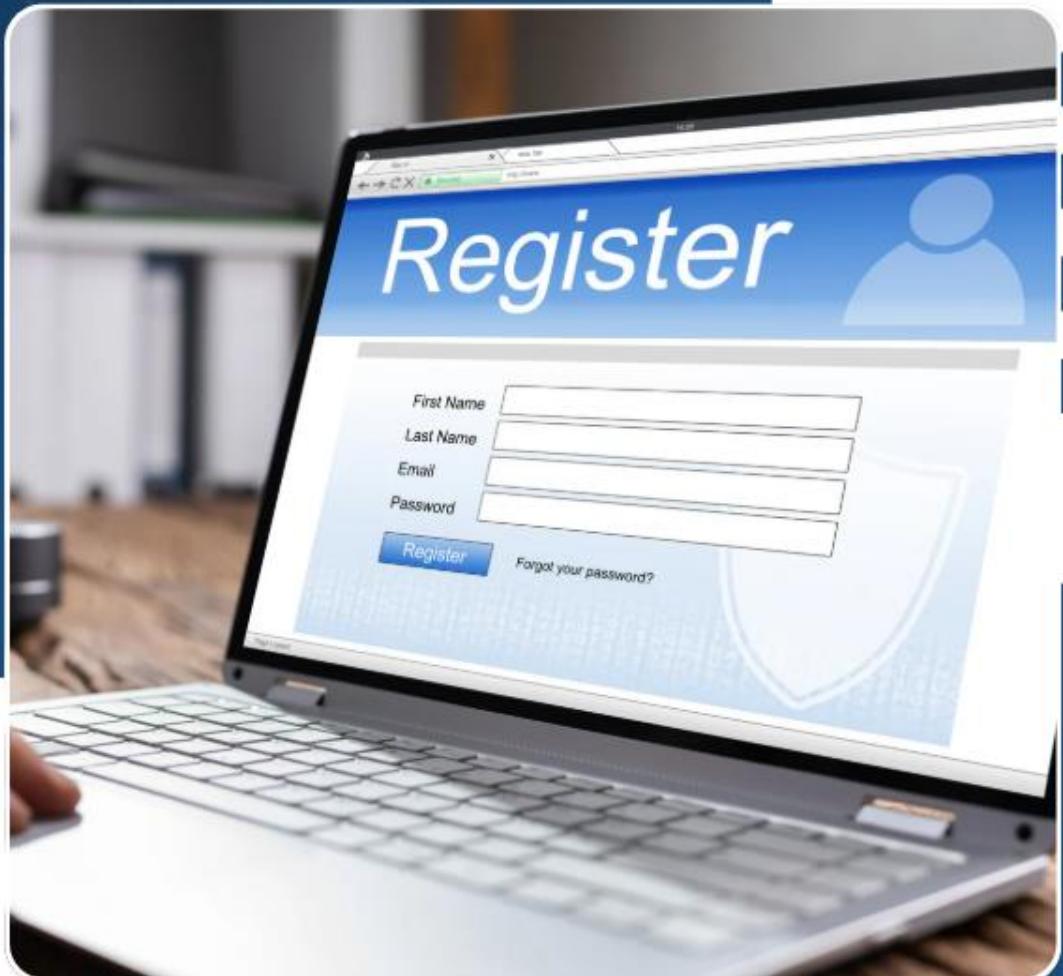

Even small price changes can create profit or loss.

## 4 Market Is Open 24/5

Forex runs **24 hours a day, Monday to Friday**, across:

- Asia Session
- Europe Session
- US Session

This allows trading anytime.
